

Do you have Primary Sclerosing Cholangitis?

We are inviting you to take part in this survey as we believe you have valuable insights into what it is like to live with primary sclerosing cholangitis (PSC).

What is involved?

Our study will focus on better understanding some of the symptoms of PSC and how these symptoms may affect your day-to-day life.

Participation will involve a **35-minute online survey** focussed on aspects associated with living with PSC, as well as the impact of PSC on social, emotional, and financial aspects of your life.

It is entirely up to you whether you would like to take part in this study, and you may choose to stop at any time.

Who can get involved?

We are looking for people who...

- Are 18 or over
- Have PSC (including post-transplant)
- Are currently experiencing itch
- Are not participating in a clinical trial
- Live in the United Kingdom

Interested in taking part?

If you take part in this study, we will compensate you for your time and contribution to our research.
